## Our Vision

[Printer-friendly version](#)

### Imagine...

- A beautiful housing development where neighbors know and care for one another...
- A community where foster children find healing in permanent, loving families...
- A place where honorary "grandparents" tutor a child or teach him how to bake or ride a bike ...
- A neighborhood where a single mother receives the support she needs to parent the four siblings who previous had been separated...

We are building such a place.

### Our Mission

To create vibrant, multi-generational communities where children who have experienced foster care find permanent, loving families; those families receive integral support; and seniors find meaningful purpose as valued members of the community.

### Our Goals

1. Increase the number of families who can consider providing a permanent home for a foster child and/or sibling group by providing affordable housing;
2. Increase the relational support these families need to thrive by providing onsite services and by equipping and enhancing the community to begin to care for itself.

### In their words...

*"When I graduated from high school I wish that I would've had a family there. Nobody came to watch me walk down the line. I went all by myself and I cried all during graduation..."*

Sara, in foster care 14 years
